

POST-ACTIVITY REPORT

Activity Name: Data Privacy and Cybersecurity Standards Orientation & Workshop

Date and Venue: Dec 04, 2024 | PGO Conference Room (2nd Floor), Surigao City

The Data Privacy and Cybersecurity Standards Orientation & Workshop was a pivotal event designed to equip professionals with essential knowledge and skills related to data protection and cybersecurity compliance.

With the increasing prevalence of data breaches and the evolving landscape of privacy regulations, this workshop brought together participants from various sectors, including government, private industry, and education, to explore best practices and practical strategies for safeguarding sensitive information.

Led by industry experts, the sessions emphasized interactive learning through real-world scenarios, ensuring attendees left with actionable insights to enhance their organizations' data privacy frameworks.

Objectives:

- Increase understanding of data privacy laws and cybersecurity standards among participants.
- Provide practical guidance on implementing effective data protection measures within organizations.
- Familiarize attendees with local and international regulations governing data privacy and cybersecurity.
- Encourage collaboration and knowledge sharing among professionals from diverse sectors.
- Offer hands-on activities and simulations to reinforce concepts through real-world applications.
- Discuss emerging trends and challenges in data privacy and cybersecurity, equipping participants to respond effectively.

General Scenario/Highlights:

- Total Participants: **36 attendees**, comprising *18 males* and *18 females*.
- The event commenced with welcoming remarks from **Gina Preston**, the *Provincial Health Office Consultant*, who expressed gratitude to the participants and guest speakers for their involvement.
- **Mr. Reyamar Estafia**, *Planning Office II*, provided an overview of data privacy and cybersecurity, emphasizing their importance and relevance to healthcare operations.
- **Mr. Menkent Barcelon** from the *DICT Caraga Cybersecurity Section* discussed relevant standards, key policies, and frameworks applicable to health offices, including the establishment of a Computer Emergency Response Team (CERT).
- **Mr. Barcelon** also covered strategies for developing effective cybersecurity policies tailored to health office needs and best practices for securing health data in alignment with DICT recommended standards.

REPUBLIC OF THE PHILIPPINES
DEPARTMENT OF INFORMATION AND
COMMUNICATIONS TECHNOLOGY

- The workshop included an interactive session where participants worked on drafting a preliminary cybersecurity action plan, assisted by **Mr. Estafia** and **Mr. Jaykee Aba-a**, *Planning Assistant*, who helped document key standards.

Expected Outcomes:

- Participants will gain understanding of data privacy laws and cybersecurity standards relevant to healthcare.
- Improved awareness of local and international regulations, leading to better compliance practices within organizations.
- Improved the development of effective cybersecurity policies that address the unique challenges faced by healthcare providers.
